LinkedIn

A focused and analytical second-year Computer Science with Artificial Intelligence student from the University of Nottingham, I am passionate about software development. I am seeking a software engineering opportunity to leverage my problem-solving and collaboration skills.

Education

University of Nottingham **September 2022 - Present**

BSc Computer Science with Artificial Intelligence First Year Grade: 83%

(2+2 Program: Completed first two years in Ningbo; currently pursuing Level 2 courses in the UK)

Key Modules:

- *Databases and Interfaces:* Implemented SQL query processing and database management skills (88%)
- *Fundamentals of AI:* Achieved 90% accuracy in image classification using Python with MLPClassifier and Decision Tree (80%).
- *Programming Paradigms & Algorithms:* Gained proficiency in Java and C programming (87%).

Projects: *Software Engineering*

- Contributed to the design of a mobile app for community activity management, using UML diagrams for requirements documentation and Agile methodologies for iterative development.
- Implemented unit tests for Java classes, ensuring reliability and efficient collaboration using Git for version control.

Hefei 168 High School, China **September 2019 - June 2022**

Specialization: Science

Key Subjects: *Mathematics* (A), *Physics* (A), *Chemistry* (A), *Biology* (A)

Additional Subjects: *Political Science* (A), *History* (B), *Geography* (A)

Relevant Experience

Summer Research Project: AGV Scheduling Problem **July 2024- August 2024**

- Designed and implemented a dynamic workshop scheduling algorithm using Python, with a 2D visualization of AGV scheduling simulated via Pygame library.
- Conducted a comparative analysis of algorithms, selecting VNS for its 20% improvement in scheduling efficiency, showcasing problem-solving and algorithm design skills.

Internship, Publicis Group **May 2024 – July 2024**

- Collaborated across teams to produce weekly reports, driving a 9.3% increase in sales and a 28% rise in product click-through rates, enhancing customer engagement.
- Analysed advertising data using VLOOKUP and pivot tables, handling 10,000+ records weekly for optimized marketing strategies.

Summer School Program, University of Oxford **August 2023**

- Completed an intensive program focusing on AI and machine learning, achieving an overall grade of A.

- Applied Object-Oriented Programming and Convolutional Neural Networks with PyTorch to classify handwritten digits.
- Implemented high-dimensional linear regression for predicting housing prices, enhancing my programming skills and understanding of machine learning algorithms

Additional Experience

Team Leader, American Mathematical Modelling Contest **January 2024**

- Led team meetings and facilitated brainstorming sessions, enhancing group coordination and collaboration.
- Ensured the smooth conduct of the four-day competition, successfully submitting the project paper ahead of schedule.

International Integration Committee Member, SESA **September 2022 – June 2023**

- Organized and hosted two large-scale events with over 100 participants, enhancing skills in event management and cross-cultural communication.
- Served as the host, clearly communicating event rules and safety protocols, ensuring smooth operations and high participant engagement.

Technical Skills

- Programming Languages: Python, Java, C, SQL
- Tools & Frameworks: Git, JUnit, SQL Server, Agile, Excel
- Key Skills: Unit testing, version control, team collaboration
